

ADL Cleaning

Thermal disinfection of foam mattresses and pressure relief systems

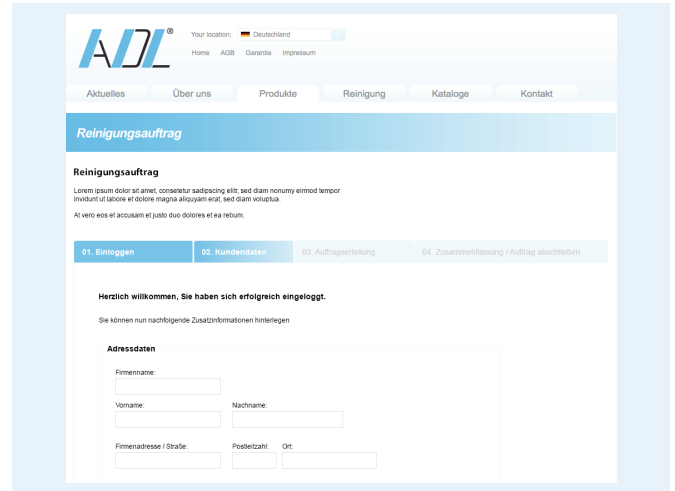

ADL[®] Cleaning

Thermal disinfection of foam mattresses and pressure relief systems including TSI (technical safety inspections) of the pumps.

- Steam disinfection procedure in full compliance with to the guidelines of the RKI (Robert Koch Institute) through the most modern autoclave technology
- Possibly chemical disinfection (process is residue-free, harmless to health)
- The cleaning process is tested and certified by the DQS certificate ISO 13485 and Environmental Laboratory of the University of Mainz and Hygiene Institute Potsdam
- Disassembly of all parts and testing for leaks
- Safety check of the pumps acc. § 11 MPGBetriebV (DGUV3/VBG4)
- Testing with state-of-the-art technical instruments acc. DIN EN 62353; VDE 0751-1
- Include Test report, certificate and sticker
- Required repairs and the use of spare parts after consultation and cost estimate
- Electricity for this energy-intensive cleaning process is generated from the sun through our very own Photovoltaic installation.

Photovoltaic installation ADL in Amt Wachsenburg (Erfurt).
